BOARD OF DIRECTORS REPORT

On behalf of the Board of Directors, I am pleased to present the 2024 Annual Report, showcasing Nama Electricity Distribution Company's (NEDC) achievements and commitment to excellence in the energy sector. This year, we have solidified our position as a key player, driven by Innovation, Governance, and People Capabilities, while maintaining the highest Health, Safety, and Environment (HSE) standards.

Health, Safety, and Environmental Excellence

The safety of our people, partners, and the public is our top priority. The Board is committed to maintaining the highest HSE standards in all our operations. In 2024, we achieved zero Lost Time Injuries (LTI) across Oman, marking a remarkable achievement in our commitment to safety.

Financial and Operational Excellence

In 2024, NEDC achieved significant milestones, with a customer base of 1.35 million, revenue of RO 304.260 million, and EBITDA of RO 193.9 million. We adhere to APSR guidelines and align with OIA's strategic vision, ensuring transparency and accountability.

Customer-Centric Approach

Our customer service remained uninterrupted during the merger transition, with an Omanization rate of 98.6%. We launched a customer experience enhancement program, including digital service innovations and a feedback-driven improvement model.

In-Country Value and Sustainability

We support local SMEs and have increased local procurement by 7%. We also expanded our renewable energy portfolio, increasing the DC capacity of connected PV systems to 92.500 MW.

Technological Advancements

We invested in infrastructure and technology, achieving 75.48% smart meter deployment. We aim for 100% deployment by 2025.

Risk Management and Governance

We enhanced our risk management framework to address key operational and market risks, including cyber threats and supply chain disruptions.

Gratitude and Acknowledgments

We extend our deepest gratitude to His Majesty Sultan Haitham bin Tariq, our cooperation partners, NAMA Holding, NAMA Supply Company, OIA, and APSR for their support.

Looking Ahead

NEDC remains committed to driving innovation, fostering sustainability, and delivering exceptional value to our stakeholders. Together, we will continue to power the Sultanate's growth and prosperity.

Thank you for your trust and support.

Fathi Abdullah Al Bulushi

On Behalf of the Board of Directors

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF NAMA ELECTRICITY DISTRIBUTION COMPANY SAOC

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Nama Electricity Distribution Company SAOC (the "Company"), which comprise the statement of financial position as at 31 December 2024, and the statement of other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2024 and its financial performance and cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Sultanate of Oman, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material uncertainty related to going concern

We draw attention to Note 2 in the financial statements, which indicates that as of 31 December 2024, the Company's current liabilities exceeded its current assets by RO 252 million (31 December 2023: RO 647 million). As stated in Note 2, these events or conditions, along with other matters as set forth in Note 2, indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Other information

The other information comprises of Board of Directors' report. Management is responsible for the other information.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF NAMA ELECTRICITY DISTRIBUTION COMPANY SAOC (CONTINUED)

Report on the audit of the financial statements (continued)

Other information (continued)

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of the auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management and audit committee for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards and their preparation in compliance with the relevant requirements of the Commercial Companies Law of 2019 of the Sultanate of Oman, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Audit committee is responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF NAMA ELECTRICITY DISTRIBUTION COMPANY SAOC (CONTINUED)

Report on the audit of the financial statements (continued)

Auditor's responsibilities for the audit of the financial statements (continued)

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with audit committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

As required by the applicable provisions of the Commercial Companies Law of 2019 and the Ministerial Decision 146/2021, we report that:

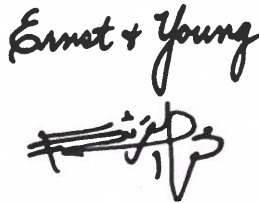

- we have obtained all the information and explanations we considered necessary for the purposes of our audit;
- the Company has maintained accounting records and the financial statements are in agreement therewith;
- the Company has carried out physical verification of inventories;

**INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF
NAMA ELECTRICITY DISTRIBUTION COMPANY SAOC (CONTINUED)**

Report on the audit of the financial statements (continued)

Report on other legal and regulatory requirements (continued)

- the financial information included in the Board of Directors' report is consistent with the books of accounts of the Company; and
- based on the information that has been made available to us, nothing has come to our attention, which causes us to believe that the Company has contravened, during the year ended 31 December 2024, any of the applicable provisions of the Commercial Companies Law of 2019 or its Articles of Association, which would materially affect the financial performance of the Company for the year ended 31 December 2024 or its financial position as at 31 December 2024.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

1 REPORTING ENTITY

Nama Electricity Distribution Company SAOC (the 'Company') (formerly known as Mazoon Electricity Distribution Company SAOC) is a company domiciled in the Sultanate of Oman.

The business activities of Company is primarily undertaking the regulated distribution of electricity in all governorates of Oman excluding Dhofar governorate under a license issued by the Authority for Public Services Regulation (APSR), Oman. The Company commenced its operations on 1 May 2005 (the Transfer Date) following the implementation of a decision of the Ministry of National Economy (the Transfer Scheme) issued pursuant to Royal Decree 78/2004. The registered address of the Company is P.O. Box 1721, Postal Code 311 Murtafaat Al Mata, Al Seeb, Muscat Governorate, Sultanate of Oman.

As part of the reorganization of Electricity Holding Company SAOC ("EHC", or the "Holding Company"), EHC, in 2023, holding 99.99% shares in the Company, effective as of 1 June 2023 (the "Reorganization"), the Company (i) received as contribution the distribution business of its sister companies Nama Electricity Supply Company SAOC ("NESC") (formerly Muscat Electricity Distribution Company SAOC ("MEDC")), Majan Electricity Company SAOC ("MJEC") and Rural Areas Electricity Company SAOC ("RAECO"), all of which are owned by the Company's shareholder Electricity Holding Company SAOC (EHC), and transferred / distributed its supply business to MEDC, which was renamed to Nama Electricity Supply Company SOAC ("NESC").

Nama Electricity Distribution Company SAOC is a 99.99% subsidiary of the EHC; a company registered in the Sultanate of Oman, whereas, remaining 0.01% is equally held by Numo Institute for Competency Development LLC and Nama Shared Services LLC which are wholly owned by EHC. The Ultimate Parent is the Government of Sultanate of Oman, as it holds 100% shareholding in the EHC through the Oman Investment Authority (OIA) pursuant to the Royal Decree 61/2020 under which all the shareholdings owned by Ministry of Finance (MoF) in the Holding Company have been transferred to OIA.

In 2017, the Company has established a SPV, (Special Purpose Vehicle) Mazoon Assets Company SAOC (subsidiary), which is 99.99% owned by the Company.

In 2024, the Company has established a SPV, (Special Purpose Vehicle) Nama Assets Company SPC (subsidiary), which is 100% owned by the Company.

2 BASIS OF ACCOUNTING

Fundamental Accounting Concept

As at 31 December, 2024, the current liabilities of the Company exceeded its current assets by RO 252 million (31 December 2023: RO 647 million), which may indicate the existence of a material uncertainty relating to going concern as the Company will require additional funding and financial support to meet its financial obligations as they fall due and continue its operations for the foreseeable future.

Management believes that it is appropriate to prepare the financial statements on a going concern basis on the strength of continued financial support from the Holding Company including the undertaking from the Government, under the Sector Laws, to secure the availability of the necessary finance for the Company to undertake its activities and achieve its objectives as long as its capital is wholly owned by the Government. Further, the Company intends to raise long-term debt amounting to USD 700 million (OMR 270 million) through the issuance of local bonds and syndicated term facilities during the next 12 months, which will be utilized to settle its short-term borrowings and other current liabilities, which will significantly improve the current net liability position. The company also has unutilized credit lines amounting to OMR 92.8 million, further has initiated discussions with lenders to roll over /refinance its existing short-term facilities upon maturity, until the completion of the long-term financing program.

The above factors will enable the Company to continue to operate as a going concern for the foreseeable future and to discharge its liabilities to other parties, as they fall due and management believes that such support will continue. Accordingly, these financial statements are prepared on a going concern basis.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

3 BASIS OF PREPARATION

a) *Statement of compliance*

These financial statements for the year ended 31 December 2024 have been prepared in accordance with International Financial Reporting Standard ("IFRS") as issued by the International Accounting Standards Board ("IASB"), and the requirements of the Commercial Companies Law of 2019, as amended.

b) *Basis of measurement*

These financial statements are prepared on historical cost basis except for derivative financial instruments which are measured at fair value.

c) *Presentation and functional currency*

These financial statements are presented in Rial Omani ("RO"), which is the Company's functional currency. All amounts have been rounded to the nearest thousand (RO '000 and USD '000) except where otherwise stated.

d) *Use of estimates and judgments*

The preparation of the financial statements in conformity with IFRSs requires the management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimates are revised and in any future periods affected.

Judgments

In the process of applying the accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant impact on the amounts recognised in the financial statements.

Assessment of contingencies and claims

The Company is subject to claims and actions for which no provisions have been recognised in relation to its distribution business. The facts and circumstances relating to particular cases are evaluated regularly in determining whether a provision relating to a specific litigation should be recognised or revised. A provision is recognised when, the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If these conditions are not met, no provision is recognised by the Company. Accordingly, significant management judgement relating to provisions and contingent liabilities is required, since the outcome of litigation is difficult to predict.

Determining the lease terms

In determining the lease terms, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

The Company has the option, under some of its leases to lease the assets for additional terms. The Company applies judgement in evaluating whether it is reasonably certain to exercise the option to renew. That is, it considers all relevant factors that create an economic incentive for it to exercise the renewal. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise (or not to exercise) the option to renew or to terminate (e.g., a change in business strategy, construction of significant leasehold improvements or significant customization to the leased asset).

3 BASIS OF PREPARATION (CONTINUED)

Determining the lease terms (continued)

Modification / extinguishment of financial liabilities

As per requirements of IFRS 9, an exchange between an existing borrower and lender of debt instruments with substantially different terms shall be accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability or a part of it (whether or not attributable to the financial difficulty of the debtor) shall be accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial liability. IFRS 9 also requires entity to evaluate the qualitative factors including change in interest rates and extension in term of the debt. Therefore, this assessment requires considerable judgement. The details of restructuring of loans have been disclosed in note 19 to the financial statements.

Key sources of estimation uncertainties

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting date, that may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Revenue recognition

Revenue from the distribution use of system charges is calculated as per the distribution use of system methodology statement agreed with the Authority for Public Services Regulation (APSR). The revenue is calculated and billed to licensed supply companies based on the Regulated Units Distributed (RUD). As per the distribution use of the system charge methodology statement, the Company calculates the DUOS rate per MWh based on the forecasted RUD and Maximum Allowed Revenue (MAR).

Provision for inventory obsolescence

Inventories are held at the lower of cost and net realisable value. When inventories become old or obsolete, an estimate is made of their net realisable value. For individually significant amounts this estimation is performed on an individual basis. Amounts which are not individually significant, but which are old or obsolete, are assessed collectively and a provision applied according to the inventory type and the degree of ageing or obsolescence, based on anticipated selling prices. At the reporting date, spares and consumables were RO 5.7 million (2023: RO 12.8 million) with provisions for old and obsolete inventories of RO 1.8 million (2023: RO 1.4 million). Any difference between the amounts actually realised in future periods and the amounts expected will be recognised in the statement of comprehensive income.

Useful lives of property, plant and equipment

The Company's management determines the estimated useful lives of its property, plant and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. Management reviews the residual value and useful lives annually and future depreciation charge would be adjusted where the management believes the useful lives differ from previous estimates.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

3 BASIS OF PREPARATION (CONTINUED)

Key sources of estimation uncertainties (continued)

Impairment of non-financial assets

An impairment loss is recognised whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. The recoverable amount of the cash generating unit is the greater of its value in use and its fair value less cost to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the cash generating unit.

The management determines whether there are any indications of impairment to carrying value of property, plant and equipment at each reporting date because of the difference between the duration of the contracted cash flows and accounting depreciation of assets. This requires an estimation of the value in use of the cash generating unit. Estimating the value in use requires the Company to make an estimate of the residual value of the cash generating unit at the end of the term of the PPA considering the expected future cash flows for the period beyond the term of the PPA and also a suitable discount rate in order to calculate the present value of those cash flows.

Provision for current tax and deferred tax

Uncertainties exist with respect to the interpretation of tax regulations and the amount and timing of future taxable income. Given the wide range of business relationships and nature of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Company reviews the provision for tax on a regular basis. In determining the provision for tax, laws of particular jurisdictions (where applicable entity is registered) are taken into account. The management considers the provision for tax to be a reasonable estimate of potential tax liability after considering the applicable laws and past experience. The Company has evaluated the available evidence about future taxable income and other possible sources of realisation of income tax assets, and the amount recognised has been limited to the amount that, based on management's best estimate, is more likely than not to be realised.

Leases – Estimating the incremental borrowing rate

The Company cannot readily determine the interest rate implicit in the lease, therefore it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the fund necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Company 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Company estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates.

Allowance for expected credit losses

The allowance for expected credit losses for financial assets (including the financial guarantees) are based on assumptions about the risk of default and expected loss rates. The management uses judgement in making these assumptions and selecting the inputs to the impairment calculations based on the past history, existing market conditions as well as forward looking estimates at the end of each reporting year.

4 RESTRUCTURING OF BUSINESS

The Oman Investment Authority (OIA), received a letter number 1145/December 2021 dated 26 December 2021, from H.E. Mohammed Al Rumhi, Minister of Energy and Minerals and Chairman of the Authority for Public Services Regulation, Oman relating to initiatives aimed at reducing the operational costs and increasing efficiency in the electricity sector (the Notification). The Notification sets out, in very broad terms, plans to reorganise the distribution and supply companies in Oman, with the exception of the Dhofar Governorate and in this regard stipulates: "combining the distribution and supply companies into two companies (a supply company and another distribution in all governorates of the Sultanate except for the Governorate of Dhofar) to enhance efficiency and reduce operational and administrative costs" (DISCO Reorganisation).

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

4 RESTRUCTURING OF BUSINESS (CONTINUED)

The following events occurred during prior year ended 31 December 2023:

- The Board of Directors of the Company resolved in their meeting held on 27 April 2023, to start the process of transfer of assets and liabilities pertaining to distribution assets from Nama Electricity Supply Company SAOC (NESC), Majan Electricity Company SAOC (MJEC) and Rural Areas Electricity Company SAOC (RAECO) to Nama Electricity Distribution Company SAOC (NEDC).
- The shareholders of the Company in Ordinary General Meeting dated 7 May 2023 unanimously resolved and approved the start of restructure directives. The shareholders approved to enter into Business Transfer Agreement, to transfer of distribution's assets to the Company from NESC, MJEC and RAECO as per earlier APRS directives on 26 December 2021. The shareholders also approved to enter into Business Transfer Agreement, to transfer of supply assets out of the Company to NESC as per earlier APRS directives on 26 December 2021.
- All the companies (i.e. NEDC, NESC, MJEC and RAECO) involved in restructuring are under common control of Electricity Holding Company SAOC, and the above transaction has been entered with no consideration. Accordingly, the transfer in / out of net assets has been considered as contribution / distribution to the shareholders.
- Pursuant to the above Board of Directors and Ordinary General Meeting, Business Transfer Agreement (BTA) was finalised on 1 June 2023 between the Group companies involved in the restructuring.
- Authority for Public Services Regulation (APSR) issued new license. The new license was effective from 1 June 2023.
- The new structure was put in place and executed on 1 June 2023.
- All the employees pertaining to distribution business of MJEC, NESC and RAECO were transferred to the Company on 1 June 2023.

Accordingly, the legal formalities associated with the restructuring were completed in 2023 and the restructuring of business was effective from 1 June 2023. The impact of restructuring on the Company is provided in note 4.1 and 4.2. The supply business has been classified as a discontinued operation with effect from 31 May 2023.

The distribution business effective from 1 June 2023 was transferred to the Company. Accordingly, the assets and liabilities pertaining to distribution business of NESC, MJEC and RAECO, at 1 June 2023 (date of transfer), were transferred to the Company and accounted for prospectively from effective date of transfer.

4.1 The details of assets and liabilities of distribution business taken over by the Company were as follows:

	<i>NESC</i> <i>RO '000</i>	<i>MJEC</i> <i>RO '000</i>	<i>RAECO</i> <i>RO '000</i>	<i>Total</i> <i>RO '000</i>
Assets

Employees' end of service benefits	30
Trade and other payables	90,786
	<u>91,021</u>
Carrying values of the net assets transferred	<u>59,778</u>

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

5 NEW IFRS ACCOUNTING STANDARDS

a) *New and amended standards and interpretations*

The Company applied for the first-time certain standards and amendments, which are effective for annual periods beginning on or after 1 January 2024 (unless otherwise stated). The Company has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

Amendments to IFRS 16 - Lease Liability in a Sale and Leaseback

The amendments in IFRS 16 specify the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains.

The amendments had no impact on the Company's financial statements.

Amendments to IAS 1 - Classification of Liabilities as Current or Non-current and Non-Current liabilities with covenant

The amendments to IAS 1 specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification

In addition, the Company is required to disclose when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within twelve months.

The amendments had no impact on the Company's financial statements.

Disclosure: Supplier Finance Arrangements - Amendments to IAS 7 and IFRS 7

The amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures clarify the characteristics of supplier finance arrangements and require additional disclosure of such arrangements. The disclosure requirements in the amendments are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on the Company's liabilities, cash flows and exposure to liquidity risk.

The amendments had no impact on the Company's financial statements

b) *Standards issued but not yet effective*

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below. The Company intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

Lack of exchangeability – Amendments to IAS 21

In August 2023, the IASB issued amendments to IAS 21 The Effects of Changes in Foreign Exchange Rates to specify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The amendments also require disclosure of information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.

The amendments will be effective for annual reporting periods beginning on or after 1 January 2025. Early adoption is permitted, but will need to be disclosed. When applying the amendments, the Company cannot restate comparative information.

The amendments are not expected to have a material impact on the Company's financial statements.

5 NEW IFRS ACCOUNTING STANDARDS (CONTINUED)

b) *Standards issued but not yet effective (continued)*

IFRS 18 Presentation and Disclosure in Financial Statements

In April 2024, the IASB issued IFRS 18, which replaces IAS 1 Presentation of Financial Statements. IFRS 18 introduces new requirements for presentation within the statement of profit or loss, including specified totals and subtotals. Furthermore, entities are required to classify all income and expenses within the statement of profit or loss into one of five categories: operating, investing, financing, income taxes and discontinued operations, whereof the first three are new.

It also requires disclosure of newly defined management-defined performance measures, subtotals of income and expenses, and includes new requirements for aggregation and disaggregation of financial information based on the identified 'roles' of the primary financial statements (PFS) and the notes.

In addition, narrow-scope amendments have been made to IAS 7 Statement of Cash Flows, which include changing the starting point for determining cash flows from operations under the indirect method, from 'profit or loss' to 'operating profit or loss' and removing the optionality around classification of cash flows from dividends and interest. In addition, there are consequential amendments to several other standards.

IFRS 18, and the amendments to the other standards, is effective for reporting periods beginning on or after 1 January 2027, but earlier application is permitted and must be disclosed. IFRS 18 will apply retrospectively.

The Company is currently working to identify all impacts the amendments will have on the primary financial statements and notes to the financial statements.

IFRS 19 Subsidiaries without Public Accountability: Disclosures

In May 2024, the IASB issued IFRS 19, which allows eligible entities to elect to apply its reduced disclosure requirements while still applying the recognition, measurement and presentation requirements in other IFRS accounting standards. To be eligible, at the end of the reporting period, an entity must be a subsidiary as defined in IFRS 10, cannot have public accountability and must have a parent (ultimate or intermediate) that prepares financial statements, available for public use, which comply with IFRS accounting standards.

IFRS 19 will become effective for reporting periods beginning on or after 1 January 2027, with early application permitted.

The amendments are not expected to have a material impact on the Company's financial statements.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

6 MATERIAL ACCOUNTING POLICIES INFORMATION

The material accounting policies applied in the preparation of these financial statements are set out below.

6.1 Leases

The Company leases various properties, offices and vehicles. Rental contracts are typically made for fixed periods of 4 - 60 years but may have extension options. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants except for use for specific purposes.

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Company. At inception of a contract the Company assesses whether a contract is, or contains, a lease. A contract is or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset the Company assesses whether:

- a) the contract involves the use of an identified asset - this may be specified explicitly or implicitly and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified;
- b) the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the year of use; and
- c) the Company has the right to direct the use of the asset. The Company has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Company has the right to direct the use of the asset if either:
 - i) the Company has the right to operate the asset; or
 - ii) the Company designed the asset in a way that predetermines how and for what purpose it will be used.

At inception or on reassessment of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices. However, for the leases of land and buildings in which it is a lessee, the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

Company as a lessee

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses if any and adjusted for certain re measurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

6 MATERIAL ACCOUNTING POLICIES INFORMATION (CONTINUED)

6.1 Leases (continued)

Lease payments included in the measurement of the lease liability comprise the following:

- i) fixed payments, including in-substance fixed payments;
- ii) variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- iii) amounts expected to be payable under a residual value guarantee; and the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee or if the Company changes its assessment of whether it will exercise a purchase extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in statement of comprehensive income if the carrying amount of the right-of-use asset has been reduced to zero. The Company presents right-of-use assets and lease liabilities in separately in the statement of financial position.

The finance cost is charged to statement of comprehensive income over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

The estimated useful lives used for this purpose are:

Assets	Years
Usufruct agreement	25 - 60
Building rent	4 - 5
Vehicles	6

Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Company as a lessor

The Company has not entered into any agreement in which it is acting as a lessor.

6.2 Foreign currency transactions

In preparing the financial statements, transactions in currencies other than the Company's functional currency (foreign currencies) are recorded at the exchange rates prevailing at the dates of the transactions.

At each reporting date, monetary items denominated in foreign currencies are translated at the rates prevailing at the reporting date.

Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rates at the date of the transaction.

Translation gains and losses related to monetary items are recognized in the profit or loss in the year in which they arise.

IFRS 9 Financial Instruments has principle-based requirements for the classification of financial assets. The standard contains two primary measurement categories for financial assets: amortised cost and fair value. The classification of financial assets under IFRS 9 is generally based on the business model in which the financial asset is managed and contractual cash flows characteristics. Under IFRS 9, derivatives embedded in contracts where the host is a financial asset in the scope of the standard are never separated. Instead, the hybrid financial instrument as a whole is assessed for classification.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

6 MATERIAL ACCOUNTING POLICIES INFORMATION (CONTINUED)

6.3 Financial Instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. The principal financial instruments used by the Company are as follows:

- 1) Trade and other receivables
- 2) Cash and bank balances
- 3) Long term deposit
- 4) Term loans
- 5) Long term borrowings - Sukuks
- 6) Short term borrowings
- 7) Bank overdrafts
- 8) Trade and other payables
- 9) Lease liabilities
- 10) Derivative financial instruments

Initial recognition

Financial assets

On initial recognition, a financial asset is classified as measured at amortised cost; fair value through other comprehensive income – debt instruments; fair value through other comprehensive income – equity instruments; or fair value through profit or loss account.

Financial assets at amortised cost

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at fair value through profit or loss account:

- i) It is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- ii) Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through profit or loss account

All financial assets not classified as measured at amortised cost or fair value through other comprehensive income as described above are measured at fair value through profit or loss account.

Financial assets, at initial recognition, may be designated at fair value through profit or loss, if the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or recognizing gains or losses on them on a different basis.

Financial liabilities

Financial liabilities are classified as measured at amortised cost or fair value through profit or loss account. A financial liability is classified as at fair value through profit or loss account if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition.

Financial liabilities, at initial recognition, may be designated at fair value through profit or loss if the following criteria are met:

- i) The designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the liabilities or recognising gains or losses on them on a different basis;
- ii) The liabilities are part of a Company of financial liabilities which are managed and their performance evaluated on fair value basis, in accordance with a documented risk management strategy; or
- iii) The financial liability contains an embedded derivative that would otherwise need to be separately recorded.

Financial liabilities at fair value through profit or loss account are measured at fair value and net gains and losses, including any interest expense, are recognised in the profit or loss account.

Subsequent measurement of financial assets

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

6 MATERIAL ACCOUNTING POLICIES INFORMATION (CONTINUED)

6.3 Financial Instruments (continued)

Financial assets

Financial assets carried at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in the profit or loss account. Any gain or loss on derecognition is recognised in the profit or loss account.

Subsequent measurement of financial liabilities

The Company categorises its financial liabilities into two measurement categories: FVTPL and amortised cost.

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Gains and losses on financial liabilities designated as at FVTPL are split into the amount of change in fair value attributable to changes in credit risk of the liability, presented in other comprehensive income, and the remaining amount in profit or loss.

The Company recognises the full amount of change in the fair value in profit or loss only if the presentation of changes in the liabilities credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. That determination is made at initial recognition and is not reassessed.

Cumulative gains or losses presented in other comprehensive income is subsequently transferred within equity.

Financial liabilities not held at FVTPL are subsequently measured at amortised cost using the effective interest method.

The Company's financial liabilities include accounts payable, due to related parties, short term borrowings and term loans.

All financial liabilities of the Company are measured at amortised cost.

Derecognition of financial assets

A financial asset (or, where applicable a part of a financial asset or part of a Company of similar financial assets) is derecognised when:

- i) The rights to receive cash flows from the asset have expired; or
- ii) The Company retains the right to receive cash flows from the asset, but assumes an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; or
- iii) The Company has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognized) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognised in the statement of other comprehensive income is recognised in the profit or loss account.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

6 MATERIAL ACCOUNTING POLICIES INFORMATION (CONTINUED)

Derecognition of financial assets (continued)

Any cumulative gain/loss recognised in the statement of other comprehensive income in respect of equity instrument designated as fair value through other comprehensive is not recognised in the profit or loss account on derecognition of such instrument. Any interest in transferred financial assets that qualify for derecognition that is created or retained by the Company is recognised as a separate asset or liability.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expired.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the profit or loss account.

Impairment of financial assets

The Company recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

IFRS 9 defines expected credit losses as the weighted average of credit losses with the respective risks of a default occurring as the weightings.

At each reporting date the Company provides for expected losses on all of the following using reasonable and supportable information about past events, current conditions and reasonable and supportable forecasts of future economic conditions when measuring expected credit losses.

For trade receivables, the Company applies a simplified approach in calculating ECLs. Therefore, the Company does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For other financial assets, the Company measures expected credit losses through a loss allowance at an amount equal to:

- i) the 12-month expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or
- ii) full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

The Company provides for a loss allowance for full lifetime expected credit losses for a financial instrument if the credit risk of that financial instrument has increased significantly since initial recognition. For all other financial instruments, expected credit losses are measured at an amount equal to the 12-month expected credit losses.

6.3 Financial Instruments (continued)

Derivative financial instruments and hedge accounting

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which the Company wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's cash flows attributable to the hedged risk.

A hedging relationship qualifies for hedge accounting only if all of the following criteria are met:

- i) there is formal designation and documentation of the hedging relationship at the inception of hedge;
- ii) there is an economic relationship between the hedged item and hedging instrument;
- iii) the effect of credit risk does not dominate the value changes that result from that economic relationship; and
- iv) the hedge ratio of the hedging relationship is the same as that resulting from the quantity of hedge item that the entity actually hedges and the quantity of the hedging instrument that the entity actually uses to hedge that quantity of hedged item.

As part of risk management strategies, the Company uses derivative financial instruments, such as interest rate swaps, to hedge interest rate sensitivities. These derivative financial instruments qualify for hedge accounting and are designated as cash flow hedges. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

The Company adjusts the cash flow hedge reserve in equity to the lower of the following:

- a) the cumulative gain or loss on the hedging instrument from inception of the hedge; and
- b) the cumulative change in fair value of the hedged item from inception of the hedge.

Effectiveness testing, rebalancing and discontinuation

The Company performs prospective assessment of effectiveness of its cash flow hedges at each reporting date. The portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised in other comprehensive income and any remaining gain or loss is hedge ineffectiveness which is recognised in profit or loss.

When the Company discontinues hedge accounting for a cash flow hedge, the amount that has been accumulated in the cash flow hedge reserve remains in equity if the hedged future cash flows are still expected to occur, until such cash flows occur. If the hedged future cash flows are no longer expected to occur, that amount is immediately reclassified to profit or loss.

If a hedging relationship ceases to meet the hedge effectiveness requirement relating to the hedge ratio but the risk management objective for that designated hedging relationship remains the same, the Company adjusts the hedge ratio of the hedging relationship (i.e. rebalances the hedge) so that it meets the qualifying criteria

The Company discontinues hedge accounting prospectively only when the hedging relationship (or a part of a hedging relationship) ceases to meet the qualifying criteria (after any rebalancing). This includes instances when the hedging instrument expires or is sold, terminated or exercised.

Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located, and capitalised borrowing costs. Cost also may include transfers from statement of comprehensive income of any gain or loss on qualifying cash flow hedges of foreign currency purchases of property, plant and equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and the difference is recognised in the statement of comprehensive income.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

6 MATERIAL ACCOUNTING POLICIES INFORMATION (CONTINUED)

6.4 Property, plant and equipment

Subsequent expenditure

Subsequent expenditure is capitalised only when it increases future economic benefits embodied in the specific asset to which it relates. All other subsequent expenditure is recognised as an expense in the year in which it is incurred.

Depreciation

Depreciation is charged to the statement of comprehensive income on a straight-line basis over the estimated useful lives of the asset less its residual value.

The management assigns useful lives and residual values to the items of property, plant and equipment based on intended use of the assets and the expected economic lives of those assets. Subsequent changes in circumstances such as technological advances or prospective utilisation of the assets concerned could result in the actual lives or residual values differing from the initial estimates. The management has reviewed the residual values and useful lives of the major items of property, plant and equipment and have determined that no adjustment is necessary. The estimated useful lives for current and comparative years are as follows:

	Years
Buildings	30
Electricity distribution works	20-40
Substations, lines and cables	25-60
Other plant and machinery	10-40
Furniture, fixtures and vehicles	5-7
Plant spares	20

Capital work in progress

Capital work in progress is measured at cost and is not depreciated until it is transferred into one of the fixed asset categories, which occurs when the asset is ready for intended use.

Capital spares

Cost of capital Spares includes all expenditure directly attributable to the acquisition of capital spares.

Capital spares shall be recognised in the carrying amount of the affected item of property, plant and equipment when it is put in use. The carrying amount of the replaced item is derecognised. When it is not practical to determine the carrying amount of the replaced part, the cost of the capital spare may be used as an indication of what the cost of the replaced part was at the time it was acquired.

6.5 Intangible assets

Recognition and measurement

Intangible assets represents softwares. These intangible assets are initially recognised at cost and subsequently remeasured at cost less accumulated amortisation and any impairment losses. Internally generated intangible assets, excluding capitalised development costs, are not capitalised and charged to statement of comprehensive income in the year in which the expenditure is incurred.

Amortisation

Intangible assets with finite useful life are amortised over the estimated useful economic life of 5 to 7 years and assessed for impairment whenever there is an indication that intangible asset may be impaired. The amortisation period and method is reviewed at each reporting date. Change in expected useful life on the expected pattern of consumption of future economic benefits embodied in the intangible asset is accounted for by changing the amortisation period or method, as appropriate and treated as change in accounting estimate and accordingly accounted for prospectively. The amortisation charge is recognised in the statement of comprehensive income in the expense category consistent with the function of intangible asset.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

6 MATERIAL ACCOUNTING POLICIES INFORMATION (CONTINUED)

6.6 Inventories

Inventories are stated at the lower of cost and net realisable value. Costs comprise purchase costs and where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is calculated principally using the weighted average method. An allowance is made for slow moving and obsolete inventory items where necessary, based on management's assessment.

6.7 Cash and cash equivalents

Cash and cash equivalents comprise cash at hand, bank balances and short term deposits with an original maturity of three months or less.

For the purpose of statement of cash flows, cash in hand, all bank balances, short term bank deposits with a maturity of three months or less from the date of placement and bank overdrafts are considered to be cash and cash equivalents.

6.8 Employee terminal benefits

Provision for employee benefits is accrued having regard to the requirements of the Oman Labour Law 2003 as amended or in accordance with the terms and conditions of the employment contract with the employees, whichever is higher. Employee entitlements to annual leave are recognised when they accrue to employees and an accrual is made for the estimated liability arising as a result of services rendered by employees up to the reporting date. These accruals are included in current liabilities, while that relating to end of service benefits is categorised as a non-current liability.

End of service benefits for Omani employees are contributed in accordance with the terms of the Social Securities Law 1991 and Civil Service Employees Pension Fund Law. Gratuity for Omani employees who transferred from Ministry of Housing, Electricity and Water on 1 May 2005 is calculated based on the terms agreed between the Holding Company and the Government. An accrual has been made and is classified as a non-current liability in the statement of financial position.

6.9 Provisions

A provision is recognised when the Company has a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at reporting date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. Where some or all of the economic benefits required to settle a provision are expected to be recovered from third party, the receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

6.10 Borrowing costs

Interest expense and similar charges are expensed in the statement of comprehensive income in the year in which they are incurred, except to the extent that they are capitalised as being directly attributable to the acquisition, construction or production of a qualifying asset which necessarily takes a substantial period of time to prepare for its intended use or sale.

6.11 Impairment of non-financial assets

The carrying amounts of the Company's non-financial assets, other than inventories and deferred tax assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the assets' recoverable amounts are estimated. An impairment loss is recognised whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognised in the statement of comprehensive income unless it reverses a previous revaluation that was credited to equity, in which case it is charged to equity.

An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the assets' carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation if no impairment loss had been recognised.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

6 MATERIAL ACCOUNTING POLICIES INFORMATION (CONTINUED)

6.12 Government grants

Grants from the Government are recognised at their value where there is a reasonable assurance that the grant will be received and the Company will comply with all the attached conditions. Government grants relating to the costs are deferred and recognised in the statement of comprehensive income over the year necessary to match them with the costs that they are intended to compensate.

Government grants relating to the construction of assets are included in deferred revenue as 'funding from Government sponsored projects' within non-current liabilities and are credited to statement of comprehensive income on straight line basis over the expected useful life of the related assets.

6.13 Revenue from contracts with customers

The Company recognises revenue from contracts with customers based on the five step model:

Step 1 Identify the contract(s) with a customer

A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met.

Step 2 Identify the performance obligations in the contract

A performance obligation is a unit of account and a promise in a contract with a customer to transfer a good or service to the customer.

Step 3 Determine the transaction price

The transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties.

Step 4 Allocate the transaction price to the performance obligations in the contract

For a contract that has more than one performance obligation, the Company will allocate the transaction price to each performance obligation in an amount that depicts the consideration to which the Company expects to be entitled in exchange for satisfying each performance obligation.

Step 5 Recognise revenue

When (or as) the Company satisfies a performance obligation.

The Company satisfies a performance obligation and recognises revenue over time, if one of the following criteria is met:

- i) The customer simultaneously receives and consumes the benefits provided by the Company's performance as and when the Company performs; or
- ii) The Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- iii) The Company's performance does not create an asset with an alternative use to the Company and the Company has an enforceable right to payment for performance completed to date.

For performance obligations where none of the above conditions are met, revenue is recognised at the point in time at which the performance obligation is satisfied.

Revenue from Distribution Use of System Charges

The distribution of electricity is considered as a series of distinct goods or services that are substantially the same and that have the same pattern of transfer to the customer. The Company transfers control of electricity distributed over time and, therefore, satisfies a performance obligation and recognizes revenue over time as the customer simultaneously receives and consumes the electricity distributed by the Company. The Company recognises the distribution use of system charges when it transfers control of a product or service to a customer, i.e. when a unit of electricity is distributed to the supply business i.e. Nama Electricity Supply Company SAOC. The Company measures the progress of the transfer of each distinct unit in the series to the customer (output method or number of units distributed).

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

6.13 MATERIAL ACCOUNTING POLICIES INFORMATION (CONTINUED)

6.13 Revenue from contracts with customers (continued)

Deferred revenue

i) Installation and connection revenue

There is no separate distinct performance obligation on the Company with regard to this revenue stream, and these services cannot be distinguished from the primary business activity of the Company. Accordingly, these revenues have been deferred and will be recognized throughout the useful life of the related assets (i.e. 25 years).

ii) Assets transfer from customers

There is no separate performance obligation with respect to customer-contributed assets other than supply of electricity in the future. Therefore, consideration received (or fair value of the assets transferred) should be treated as part of the transaction price (non-cash consideration) and revenue to be recognized as and when electricity is provided to the customer in future. Accordingly, this revenue has been deferred and will be recognized throughout the useful life of the relevant assets transferred from customers.

The Company has estimated the average assets life to be 25 years based on the useful life of the Installation and connection asset. The Company recognizes the fee over 25 years.

iii) Government sponsored projects

It represents the funds received from the Government for the construction of assets for the benefit of public at large or specific Government authorities. These funds are deferred and recognised as revenue over the year of the useful life of the assets.

Variable consideration

Variable consideration amounts are estimated at either their expected value or most likely amount and included in revenue to the extent that it is highly probable that the revenue will not reverse.

Significant financing component

The Company evaluates significant financing component, if the period between customer payment and the transfer of goods/ services (both for advance payments or payments in arrears) is more than one year. The Company adjusts the promised amount of consideration for the time value of money using an appropriate interest rate reflecting the credit risk.

Contract modification

A contract modification occurs when the Company and the customer approve a change in the contract that either creates new enforceable rights and obligations or changes the existing enforceable rights and obligations. Revenue related to a modification is not recognised until it is approved. Approval can be in writing, oral, or implied by customary business practices.

The Company treats the contract modification as a separate contract if it results in the addition of a separate performance obligation and the price reflects the standalone selling price of that performance obligation. Otherwise, a modification (including those that only affect the transaction price) is accounted for as an adjustment to the original contract, either prospectively or through a cumulative catch-up adjustment.

The Company accounts for a modification prospectively if the goods or services in the modification are distinct from those transferred before the modification. Conversely, the Company accounts for a modification through a cumulative catch-up adjustment if the goods or services in the modification are not distinct and are part of a single performance obligation that is only partially satisfied when the contract is modified.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

6 MATERIAL ACCOUNTING POLICIES INFORMATION (CONTINUED)

7.13 Income tax

Income tax for the year comprises current and deferred tax, which is computed as per the fiscal regulations of the Sultanate of Oman. Income tax is recognised in the statement of comprehensive income except to the extent that it relates to items recognised directly to equity, in which case it is recognised in equity.

Deferred tax is calculated on temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantially enacted at the reporting date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

7.14 Dividends

The Board of Directors takes into account appropriate parameters including the requirements of the Commercial Companies Law while recommending the dividend. Dividends on ordinary shares are recognised when they are approved for payment.

7.15 Directors' sitting fees and remuneration

Directors' sitting fees and remuneration are approved by the shareholders in the ordinary annual general meeting of the Company and are recognised as an expense in the statement of comprehensive income.

7.16 Earnings per share

The Company presents basic and diluted earnings per share (EPS) for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders by the weighted average number of ordinary shares outstanding during the year. Diluted EPS is same as Basic as there are no convertible instruments.

7.17 Measurement of fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for leasing transactions that are within the scope of IFRS 16.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

Level 1: Quoted market price (unadjusted) in an active market for an identical instrument.

Level 2: Valuation techniques based on observable inputs. This category includes instruments valued using quoted market prices in the active market for similar instruments, quoted market prices for identical or similar instruments in markets that are considered less than active, or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Valuation techniques using significant unobservable inputs. This category includes instruments that are valued based on quoted prices of similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

As at 31 December, 2024, the Company held interest rate swap derivatives instruments measured at fair value. The fair values of the interest swaps arrangements are determined using level 2 valuation technique.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

6 MATERIAL ACCOUNTING POLICIES INFORMATION (CONTINUED)

7.18 Current versus non-current classification

The Company presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting date
- Cash or Cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting year.

All other assets are classified as non-current

A liability is current when:

- It is expected to be settled in the normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting date
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting date.

7.19 Common control transactions

A business combination involving entities or businesses under common control is a business combination in which all of the combining entities or businesses are ultimately controlled by the same party or parties both before and after the business combination, and that control is not transitory. For business combinations under common control, the Company applies the book value method of accounting. According to this method, the assets and liabilities taken over are recorded in the financial statements at the recorded book values immediately prior to the acquisition date. The difference between the net assets taken over and the consideration paid is recognised in equity under retained earnings. The Company has adopted the policy of recognizing the assets of the distribution business prospectively from the date of business transfer.

7.20 Offsetting of financial instruments

Financial assets and financial liabilities are offset, and the net amount is presented in the statement of financial position when and only when, the Company has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the obligation simultaneously.

The intangible assets are amortised over the year from 5 to 7 years on straight line basis.

9.1 The Company performed an assessment on its investment in the implementation of CC&B software for customer database and billing management and other softwares. As a result, the management concluded that the intended purpose from the use of the software was not fulfilled. Accordingly, an impairment loss of RO 0.45 million (31 December 2023: RO 4.16 million) has been recognized for the software.

10 INVESTMENT IN A SUBSIDIARY

Pursuant to the decision of the shareholders in the extra ordinary general meeting held on 20 August 2017, the Company established a special purpose vehicle for raising finance by issuance of Sukuk in the international market. Accordingly, Mazoon Assets Company SAOC, a Company registered under the Commercial Companies Law of the Sultanate of Oman was established with the shareholding as follows:

	<i>Number of shares</i>	2024 RO	2023 RO
Mazoon Electricity Company SAOC	499,950	499,950	499,950
Nama Shared Services LLC	25	25	25
Numo Institute for Competency Development LLC	25	25	25
	500,000	500,000	500,000

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

10 INVESTMENT IN A SUBSIDIARY (CONTINUED)

Investment represents the Company's investment in Mazoon Assets Company SAOC. The main objective of the Mazoon Assets Company as per the Memorandum and Articles of Association is to raise the finance. In addition to the 99.99 percent shareholding, the Company also exercises control over the affairs of the SPV Mazoon Assets Company SAOC with three of its senior executives as members in the five member board of directors. The other shareholders namely, Nama Shared Services LLC and Numo Institute for Competency Development LLC, who hold 0.005 percent shares each in Mazoon Assets Company SAOC are the companies within the Nama Holding Company and are wholly owned by the Electricity Holding Company.

11 STORES AND SPARES

Bank overdraft (note 13.2)	-	(8,612)
<i>Cash and cash equivalents for the purpose of statement of cash flows</i>	<u>44,134</u>	<u>(4,915)</u>

13.1 The Company assessed that the expected credit losses related to bank balances are immaterial to the financial statements as a whole.

13.2 The Company has availed a working capital facility (overdraft and revolving short term loan) and bank guarantee from Ahli Bank SAOG for an amount of RO 15 million. The overdraft limit of RO 10 million is interchangeable between overdraft and revolving short term loan upon a condition that the combined utilisation of both the facilities not to exceed RO 15 million at any point of time. The facilities are unsecured, payable on demand and carry interest rate at the rate of 4% (31 December 2023: 3.5% to 4%) per annum.

14 SHARE CAPITAL

The Company's authorised, issued and paid up share capital consist of 200,000,000 shares (31 December 2023: 200,000,000 shares) of RO 1 each. The details of shareholders are as follows:

	2024 Number of shares	2023 Number of shares	2024 RO	2023 RO
Electricity Holding Company SAOC	199,980,000	199,980,000	199,980,000	199,980,000

	<u>200,000,000</u>	<u>200,000,000</u>	<u>200,000,000</u>	<u>200,000,000</u>

15 LEGAL RESERVE

Article 132 of the Commercial Companies Law of 2019 requires that 10% of a Company's net profit after deduction of taxes to be transferred to a non-distributable legal reserve until the amount of the legal reserve becomes equal to one-third of the Company's fully paid share capital. This reserve is not available for distribution. No reserve has been set aside during the current year as the reserve has reached its limit. During the prior year ended 31 December 2023, the Company has transferred RO 16.67 million to legal reserve. The transfers were made from retained earnings and shareholders' fund amounting to RO 13.83 million and RO 2.84 million respectively, based on legal opinion received by the Company.

16 GENERAL RESERVE

In accordance with Article 133 of the Commercial Companies Law of 2019 and the Company's policy, an amount not exceeding 20% of the net profit of each financial year after deduction of taxes and transfer to legal reserve should be transferred annually to a general reserve until the balance of general reserve reach one half of the share capital. The reserve is available for distribution to the shareholders.

The shareholders in the Annual General Meeting held on 30 March 2024 have resolved to transfer the accumulated balance in the general reserve RO 21.5 million to retained earnings effective 1 January 2024 and not to transfer any amount to the general reserve in the future.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

17 SHAREHOLDERS' FUNDS

The shareholders in their meeting held on 7 May 2023 resolved to convert shareholders' loan of RO 93.1 million including accrued interest (as at 31 December 2022) into shareholders' funds under equity, and ceased to charge interest thereafter. The shareholders also in that meeting resolved to convert shareholder's loan transferred from Majan Electricity Company SAOC of RO 23.02 million to shareholders' funds under equity. At 30 May 2023, RO 50 million was converted from shareholders fund to share capital pursuant to completion of legal formalities. Out of the remaining shareholder's funds of RO 66.1 million, RO 40 million was transferred to NESC. The shareholders waived the interest charged from 1 January 2023.

18 CASH FLOW HEDGING RESERVE

The cash flow hedging reserve represents the cumulative effective portion of gains or losses arising on changes in fair value of hedging instruments. The cumulative gain or loss arising on changes in fair value of the hedging instruments that are recognised and accumulated under the heading of cash flow hedging reserve will be reclassified to statement of comprehensive income only when the hedged transaction affects the statement of comprehensive income or included as a basis adjustment to the non-financial hedged item.

	2024 RO'000	2023 RO'000
Opening balance	4,796	2,877
Change in fair value during the year	(2,057)	(2,401)
Transfer of net assets from related parties (note 4.1)	-	4,320
	2,739	4,796
Less: Related deferred tax assets (note 35.4)	(410)	(719)
	2,329	4,077

At the reporting date, the Company has Interest Rates Swap (IRS) agreements covering 42% (31 December 2023: 42%) of the term loans with a fixed interest rate of 2.2% per annum. The fair value of the interest rate swaps is based on valuation provided by the counter party bank on the reporting date. The interest rate swaps are designated as cash flow hedges and the fair value thereof has been dealt within other comprehensive income.

	Fair value RO'000	Notional amount Total RO'000	Notional by term to maturity more than		
			1 - 12 months RO'000	1 upto 5 years RO'000	Over 5 years RO'000
31 December 2024					
Interest rate swaps	2,739	97,525	23,524	74,001	-
31 December 2023					
Interest rate swaps	4,796	121,049	23,524	97,525	-

Valuation techniques and significant inputs:

The following tables show the valuation techniques used in measuring Level 2 fair values for financial instruments in the statement of financial position and there are no significant unobservable inputs used.

Type Valuation techniques

Interest rate swaps The fair value is based on the valuation provided by the counter party bank.

There is an economic relationship between the hedged item and the hedging instrument as the terms of the interest rate swap match the terms of the fixed rate loan 1 (i.e., notional amount, maturity, payment and reset dates). The Company has established a hedge ratio of 66% for the hedging relationships as the underlying risk of the interest rate swap is identical to the hedged risk component. The Company performs the critical terms match to test the hedge effectiveness as of the reporting date.

The hedge ineffectiveness can arise from:

- Different interest rate curve applied to discount the hedged item and hedging instrument
- Differences in timing of cash flows of the hedged item and hedging instrument
- The counterparties' credit risk differently impacting the fair value movements of the hedging instrument and hedged item

There is no hedge ineffectiveness in the interest rate swap arrangement.

Less: unamortised transaction costs (note 19.2)	(2,003)	(1,937)
	<u>224,835</u>	<u>285,232</u>

19.2 The movement of unamortised transaction costs is as follows:

	2024 RO'000	2023 RO'000
At 1 January	1,937	1,562
Add: Transfer from related parties upon take over of distribution business (note 4)	-	1,332
Addition during the year	1,626	-
Less: amortised during the year (note 34)	(1,560)	(957)
	<u>2,003</u>	<u>1,937</u>

19.3 Classification of term loans into current and non-current portion:

	2024 RO'000	2023 RO'000
Term loans - current portion	56,233	57,463
Unamortised costs - current portion	(852)	(861)
	<u>55,381</u>	<u>56,602</u>
Term loans - non-current portion	170,605	229,706
Unamortised costs - non-current portion	(1,151)	(1,076)
	<u>169,454</u>	<u>228,630</u>
	<u>224,835</u>	<u>285,232</u>

The Company previously had the following term facilities:

- A** The Company entered into a Dual Currency Term Loan Facility Agreement dated 17 September 2015 with a consortium of Lenders, with Ahli Bank acting as Facility Agent and Account bank, for an amount of RO 240 million.
- (i) RO 117 million, at a fixed interest rate for a period of 5 years from the date of first utilization dated 10 October 2015 of the tranche of the Term Loan, thereafter, interest to be reviewed annually. At the reporting date, the balance outstanding amounted to Nil (31 December 2023: RO 46.8 million).
- (ii) USD 320 million (equivalent to RO 123 million), at floating interest rate. At the reporting date, the balance outstanding amounted to Nil (31 December 2023: RO 49.3 million).

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

19 TERM LOANS (CONTINUED)

B As part of the reorganization of the electricity sector the following term facilities of distribution businesses have been novated from Nama Electricity Supply Company SAOC (NESC) formerly known as Muscat Electricity Distribution Company SAOC (MEDC).

- (i) RO 85 million Dual Currency Term Loan Facility Agreement dated 17 September 2015, at a fixed interest rate for a period of 5 years from the date of first utilization of the tranche of the Term Loan, thereafter, interest to be reviewed annually. At the reporting date, the balance outstanding amounted to Nil (31 December 2023: RO 34 million).
- (ii) USD 221 million (equivalent to RO 85.1 million) Dual Currency Term Loan Facility Agreement dated 17 September 2015, at a floating interest rate. At the reporting date, the balance outstanding amounted to Nil (31 December 2023: RO 34 million).
- (iii) USD 211 million (equivalent to RO 81.2 million) Dual Currency Term Loan Facility Agreement dated 26 November 2017, at a floating interest rate. At the reporting date, the balance outstanding amounted to Nil (31 December 2023: RO 38.6 million).

C As part of the reorganization of the electricity sector, the following term facilities of distribution businesses have been novated from Majan Electricity Company SAOC (MJEC).

- (i) USD 330 million (equivalent to RO 127 million) Dual Currency Term Loan Facility Agreement dated 18 April 2016, at a floating interest rate. At the reporting date, the balance outstanding amounted to Nil (31 December 2023: RO 55.9 million).
- (ii) USD 165 million (equivalent to RO 63.5 million) Dual Currency Term Loan Facility Agreement dated 01 November 2017, at a floating interest rate. At the reporting date, the balance outstanding amounted to Nil (31 December 2023: RO 28.6 million).

D The facilities as disclosed in note 19 (A, B and C) have been rescheduled in June 2024. Under the new agreement, the interest rate on USD facilities have been reduced due to improved credit ratings of the Country and Company. Maturity dates of the loans have been extended to 30 June 2029. All the remaining terms are the same as previously as described as follows:

- (i) RO 92.7 million, at a fixed interest rate, interest to be reviewed annually. At the reporting date, the balance outstanding amounted to RO 82.3 million (31 December 2023: Nil).
- (ii) USD 430.4 million (OMR equivalent to OMR 165.7 million), at a floating interest rate. At the reporting date, the balance outstanding amounted to RO 147.5 million (31 December 2023: Nil).
- (iii) During the year, term loans of the Company with the banks have been rescheduled. As the loans were originally obtained under syndication structure, therefore judgement is required to determine whether the IFRS 9 extinguishment/modification requirements would be applied on lead lender or individual borrower level. Accordingly, the management has considered Company's rights and obligation under the loan agreement and concluded that the Company had loans with individual borrowers and therefore the assessment is made at individual borrower level. Such rescheduling at individual borrower level is considered as modification of financial liability for accounting purposes under the requirements of IFRS 9 for the reason that the difference in present value of the cashflows before and after the rescheduling was much below than 10% threshold and interest rate deduction in certain facilities was based on Company's and Country improved credit ratings. Accordingly, modification gain of RO 3.6 million has been recorded in the statement of comprehensive income. Further, as a result of above restructuring, the old term loans repaid to individual lenders under the netting arrangement amounting to USD 260.8 million (OMR equivalent to OMR 100.4 million) have been derecognised and related transaction costs of RO 0.59 million have been charged to statement of comprehensive income. Accordingly, the new term loans amounting to USD 260.8 million (OMR equivalent to OMR 100.4 million) disbursed from existing and new lenders under the netting arrangement have been recognised at their fair value which is not different from the transaction value.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

19 TERM LOANS (CONTINUED)

19.4 Compliance with covenants

The term loan facilities as disclosed in D contain certain covenants pertaining to, amongst other things, liquidation and merger, entering into material new agreements, negative pledge, disposal of asset, granting of loan and guarantee, acquisition of capital assets, debt service coverage ratio, net debt to equity, change of business, loan and guarantee, hedging agreement, etc., which the Company is required to comply. The details of financial covenants are as below:

- (i) Net debt to equity ratio of the Company as of reporting date was 1.45 times (31 December 2023: 1.37 times) against the maximum limit of 2.33 times.
- (ii) Debt service coverage ratio of the Company for the year was 1.55 times (31 December 2023: 1.31 times) against the minimum requirement of 1.10.

At 31 December 2024 and 2023, the Company was in compliance with these covenants.

20 LONG TERM BORROWINGS - SUKUKS

- a) In 2017, the Company raised long-term finance to meet the capital expenditure needs through assets backed Sukuk route. In order to facilitate the funding the Company formed Mazoon Assets Company SAOC, a Special Purpose Vehicle (SPV), for the purpose of raising the Sukuk finance. On 1 November, 2017, Mazoon Assets Company SAOC successfully priced its debut Reg S/144A US\$ 500 million (RO 192.5 million) 10-year Sukuk offering following the Sharia compliant Ijara Structure at the profit rate of 5.2%. The profit rate payments are due on 8 May and 8 November every year during the tenure of the Sukuk certificate and the certificates are due for repayment in full on 8 November 2027.
- b) During the year, the Company raised long-term finance to meet the capital expenditure and to refinance its short-term bridge facilities availed for capital expenditure through assets backed Sukuk route. The issuance was done through Mazoon Assets Company SAOC, a Special Purpose Vehicle (SPV) purely to raise the Sukuk finance. The following issuances were made in 2024 under the program:
 - (i) On 12 February 2024, Mazoon Assets Company SAOC successfully priced its Reg S/144A US\$ 500 million (RO 192.5 million) 5-year Sukuk offering, structured under the Shari'a-compliant Ijara structure, with a profit rate set at 5.50%. Profit payments are due on 14 February and 14 August each year during the Sukuk's tenure, and the certificates are due for full repayment on 14 February 2029. The Certificates were issued on 14 February 2024 and are listed on the London Stock Exchange.
 - (ii) On 7 October 2024, Mazoon Assets Company SAOC successfully priced its Reg S/144A US\$ 750 million (RO 288.75 million) 7-year Sukuk offering, structured under the Shari'a-compliant Ijara structure, with a profit rate set at 5.25%. Profit payments are due on 9 April and 9 October each year during the Sukuk's tenure, and the certificates are due for full repayment on 9 October 2031. The Certificates were issued on 9 October 2024 and are listed on the London Stock Exchange.

The legal form of contracts entered into for the purpose of raising, servicing and repayment of the Sukuk finance includes:

- Sale by Nama Electricity Distribution Company SAOC and purchase by Mazoon Assets Company SAOC of PPE assets.
- Lease back of these assets by Nama Electricity Distribution Company SAOC from Mazoon Assets Company SAOC under a Lease Agreement and Servicing Agency Agreement.
- Subscription agreement.
- Declaration of trust agreement.

Purchase undertaking agreement and sale and substitution agreement.

Mazoon Assets Company SAOC, which is a 99.99 percent owned subsidiary, has no economic purpose to serve other than to act as a Special Purpose Vehicle. As per agreement, Nama Electricity Distribution Company SAOC is obliged to bear all the initial issue costs as well as all recurring costs of operation.

Mazoon Assets Company SAOC recognises the financial liability in respect of the Sukuk obligation while retaining the property, plant and equipment on its statement of financial position.

At the end of the year	88,041	135,466	20,991	244,498

21.2 Installation and connection charges:

Installation and connection revenue represent the fee collected for the activities to provide services to the customer contracted for supply of electricity. Accordingly, the installation and connection revenue is recognized over the year of time as per IFRS 15. The Company has estimated the average asset life to be 25 years based on the useful life on connection and installation assets and recognized installation and connection fee over this year.

21.3 Government sponsored projects/customers contributed assets:

The Government provide funding towards the cost of property, plant and equipment and customer contributed assets. These funding/contributions are deferred over the life of the relevant property, plant and equipment. During the prior year ended 31 December 2023, an amount of RO 14.65 million has been derecognised in respect of grants outstanding from Government and quasi-Government institutions refer note 32.

21.4 Regulatory asset base adjustment:

Regulatory asset base adjustment relates to excess of maximum allowed revenue arising from the difference in price control allowed capex and actual capex outturn that will be adjusted while setting the future price control.

26 RELATED PARTY TRANSACTIONS AND BALANCES

Related parties comprise the shareholders, directors, key management personnel, business entities that have the ability to control or exercise significant influence over financial and operating decisions of the Company and entities over which certain shareholders are able to exercise significant influence.

The Government is a related party of the entity as it is the ultimate controlling party. The entity in the ordinary course of business transacts with other government owned entities. However, in view of the exemption from disclosure requirements set out in IFRS in relation to related party transactions and outstanding balances with the Government, that has control or joint control of, or significant influence over the Company and an entity that is a related party of the same government, the Company has applied the exemptions in IAS 24, related to government entities and only disclosed certain information to meet the disclosure requirements of IAS 24. The Company maintains balances with the related parties which arise in the normal course of business. The related party transactions are carried out based on mutually agreed terms. Outstanding balances at year end are unsecured and settlement occurs in cash.

Prices and terms of these transactions, which are entered into in the normal course of business, are on mutually agreed terms and conditions.

Employee Voluntary Exit Scheme Expenses (note 31.2)	(710)	2,834
	<u>37,877</u>	<u>30,284</u>

31.2 Voluntary Exit Scheme (VES) is a program for early retirement for the purpose of optimizing staff cost which was initially launched in 2023. 122 employees applied to be part of the Scheme and accordingly an amount of RO 2.8 million was provided in 2023. An amount of RO 1.8 million was paid during the year to 81 employees. As of 31 December 2024 an amount of RO 0.3 million is payable under the Scheme for 12 employees and the remaining balance of RO 0.7 million was reversed on termination of Scheme.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

32 LOSS ON DERECOGNITION OF RECEIVABLES FROM GOVERNMENT SPONSORED PROJECTS

During the prior year ended 31 December 2023, loss on derecognition of receivables from Government sponsored projects is recognised in respect of grants outstanding from Government and quasi-Government institutions towards projects which have been sponsored by such Government and quasi-Government institutions. These amounts have been due for a considerable period beyond the Company's normal credit period and the management believes that the 'reasonable assurance' criteria as required by IAS 20: Government grants was no longer met as of 31 December 2023. This loss represents the net effect of the reduction in receivables from Government sponsored projects and the related deferred revenue as of 31 December 2023.

The management continues to hold discussions with these Government and quasi-Government institutions and will recognise the grants when the Company has reasonable assurance that the grants will be received.

33 OTHER INCOME

	2024 RO'000	2023 RO'000
Penalties and fines	1,458	720
Gain on disposal of property, plant and equipment	106	3
Gain on termination of lease liability	70	-
Sale of Government contracts forms & tenders	135	249

	<u>19,963</u>	<u>22,763</u>
<i>ii) statement of other comprehensive income</i>		
Deferred tax reversal	(309)	(360)

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

35 TAXATION (CONTINUED)

The Company is subject to income tax at the rate of 15% (31 December 2023:15%) of taxable income in accordance with the Income Tax Law of the Sultanate of Oman. The deferred tax on all temporary differences have been calculated and dealt with in the statement of comprehensive income.

35.2 *Movement in current tax and deferred tax payable during the year was as follows;*

	Current tax		Deferred tax liability	
	2024	2023	2024	2023
	RO'000	RO'000	RO'000	RO'000
At 1 January	-	-	80,016	56,965
Charge for the year	-	-	19,654	22,403
Payment during the year	-	-	-	-
Transferred from related parties upon take over of Distribution business	-	-	-	648
At 31 December	-	-	99,670	80,016

35.3 Reconciliation of income tax expense

The following is a reconciliation of income tax on the accounting profit with the tax expenses at the applicable tax of 15% (2023:15%):

	2024	2023
	RO'000	RO'000
Profit before tax from continuing operations	42,185	9,043
Profit before tax from discontinuing operations	-	2,317
	42,185	11,360
Income tax as per applicable tax rate	6,328	1,704
Prior years adjustments - deferred tax	-	(10)
Deferred tax on usufruct charges derecognized	-	261
Tax impact of bad debts written off not claimed as deduction	-	546
Deferred tax on carry forward losses - unrecognised	13,635	20,262
Tax charge for the year	19,963	22,763

35.4 Deferred tax

Deferred income taxes are calculated on all temporary differences under the liability method using a principal tax rate of 15% (2023: 15%). Deferred tax asset of RO 13.6 million (2023: RO 20.3 million) on carry forward tax losses for the current year has not been recognized as management foresee remote chances of having taxable income until year 2026 due to higher tax depreciation charge which would result in a lapse of current year carry forward losses. Recognized deferred tax assets and liabilities are attributable to the following:

	2024	2023
	RO'000	RO'000
Allowance for expected credit losses	(434)	(270)
Deferred revenue	(3,030)	(3,226)
Provision for stores and spares obsolescence	(205)	(144)
Lease liabilities (including usufruct charges)	(271)	(233)
Provision for legal expenses	(250)	(1,029)
Transaction cost -long term loans	229	80
Modification gain	433	-
Transaction costs - long term loans - sukuks	664	84
Impairment of Intangible assets	(691)	(624)
Fair value adjustment of cash flow hedge (note 18)	410	719
Accelerated depreciation	102,815	84,659
	99,670	80,016

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

35 TAXATION (CONTINUED)

35.5 Status of assessments

Tax assessments for the years 2021 to 2023 have not been assessed by tax authorities. The management of the Company believes that additional taxes, if any, related to the open tax year would not be significant to the Company's financial position and statement of comprehensive income for the year ended 31 December 2024.

35.6 Tax implications for Business transfer on 1 June 2023

The business transfer has tax implications on NEDC under the prevailing tax law provisions. Presently, the book NBV as of 1st June 2023 of the NESC, MJEC and RAECO is considered as addition for tax computation purpose which has resulted in recognition of higher deferred tax liability. However, the circumstances surrounding this merger warrant special consideration from the Tax Authority, the management has filed representation seeking confirmation from the Tax Authority that the electricity sector restructuring does not give rise to any income tax implications as the restructuring was done following the government directive and the Tax Authority response is awaited.

36 CAPITAL MANAGEMENT

For the purpose of the Company's capital management, the capital comprise of share capital, reserves and retained earnings. There was no change in Company's approach to the capital management during the year. The primary objective of the Company's capital management is to maximise the shareholders' value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company may adjust the dividends payment to the shareholders, return capital to the shareholders or issue new share capital. The Company monitors capital using a gearing ratio which is 'net debt' divided by total capital plus net debt. The Company's policy is to keep the gearing ratio not exceeding 75% for debt. The Company includes within net debt, interest bearing term loans and short term borrowings, lease liabilities, bank guarantee less cash and cash equivalents.

	2024 RO'000	2023 RO'000
Net debt		
Term loans	224,835	285,232
Long term borrowings - Sukuks	669,322	192,064
Lease liabilities	16,997	16,659
Short term borrowings	164,463	451,069
Bank overdrafts	-	8,612
Less: cash and bank balances	(44,134)	(3,697)
	1,031,483	949,939
Equity (excluding cash flow hedge reserve)		
Share capital	200,000	200,000
Legal reserve	66,667	66,667
General reserve	-	21,525
Retained earnings / (accumulated losses)	32,345	(11,402)
Shareholders' fund	419,155	419,155
	718,167	695,945
Equity and net debt	1,749,650	1,645,884
Gearing ratio	59.0%	57.7%

In order to achieve this overall objective, the Company's capital management, among other things, aims to ensure that it meets its financial covenants attached to the interest bearing term loans and borrowings that defines capital structure requirements. Breaches in meeting the financial covenants would permit the lenders to immediately call term loans and short term borrowings. There have been no breaches of the financial covenants of any interest bearing term loans and short term borrowings at current year end.

Nama Electricity Distribution Company SAOC

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

37 FINANCIAL RISK MANAGEMENT

The Company has exposure to the following risks from its use of financial instruments:

- Market risk
- Credit risk
- Liquidity risk

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital. Further quantitative disclosures are included throughout these financial statements.

The Board of Directors has overall responsibility for establishing and overseeing the Company's risk management framework. The Board has entrusted the management with the responsibility of developing and monitoring the Company's risk management policies and procedures and its compliance with them.

37.1 Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Price risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of change in market prices (other than those arising from interest rate risk or foreign currency risk), whether those changes are caused by factors specific to the individual financial instruments or its issuer, or factors affecting all similar financial instruments traded in the market. The tariff for distribution of electricity is determined by long term agreements with customers or under the permitted Tariff Regulations issued by the Authority for Public Services Regulations (APSR). Accordingly, the Company is not exposed to significant price risk.

Interest rate risk

The Company has borrowings which are interest bearing and exposed to changes in underlying interest rates. The Company has entered into interest rate swaps to hedge its interest rate risk exposure on its term loans. The Company actively manages its interest rate exposure by negotiating competitive interest rates for its short-term borrowings, reflecting current market conditions. The Company's risk management policies are designed to secure favourable loan terms, maintain financial flexibility, and minimize the interest rate risk within an acceptable level of risk.

The Company does not account for any fixed rate financial liabilities at fair value through profit or loss and the Company does not designate hedging instruments under a fair value hedge accounting model. Therefore a change in interest rate at the reporting date would not affect the statement of comprehensive income.

At the reporting date, the Company's interest-bearing financial liabilities were:

	2024 RO'000	2023 RO'000
Financial liabilities		
Term loans	224,835	285,232
Long term borrowings - Sukuks	669,322	192,064
Lease liabilities	16,997	16,659
Short term borrowings	164,463	451,069
Bank overdrafts	-	8,612
	1,075,617	953,636

Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points in the variable interest rates at the reporting date would have increased / (decreased), on an annual basis, equity and statement of comprehensive income by the amounts of RO 3.1 million (2023: RO 6.4 million). This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

37 FINANCIAL RISK MANAGEMENT (CONTINUED)

37.1 Market risk (continued)

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of change in foreign exchange rates. The Company is exposed to foreign currency risk arising from currency exposure primarily with respect to the US Dollar. The Rial Omani is effectively pegged to the US Dollar and since most of the foreign currency transactions are in US Dollar, the management believes that exchange rate fluctuations would have an insignificant impact on the Company's results.

37.2 Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers. The Company attempts to control credit risk by monitoring credit exposure, limiting transactions with specific counterparties and continuously assessing the credit worthiness of counter parties.

The Company limits its credit risk with regard to bank deposits by only dealing with reputable banks and financial institutions.

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

	2024 RO'000	2023 RO'000
Amounts due from related parties	41,564	39,484
Other receivables	1,197	610
Long term deposit	500	500
Bank balances	44,130	3,682
	87,391	44,276

NOTES TO THE FINANCIAL STATEMENTS

At 31 December 2024

37 FINANCIAL RISK MANAGEMENT (continued)

37.2 Credit risk (continued)

For other receivables and amount due from related parties, the Company has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. The Company determines the expected credit losses on these items by using a provision matrix and external rating based PDs, estimated based on historical credit loss experience based on the past due status considering the credit ratings of the related parties, adjusted as appropriate to reflect current conditions and estimates of future economic conditions. Accordingly, the credit risk profile of these assets is presented based on their past due status in terms of the provision matrix and external rating based PDs.

Other receivables and related expected credit loss at reporting date is:

	<i>Current RO'000</i>	<i>0-30 RO'000</i>	<i>30-90 RO'000</i>	<i>90-365 RO'000</i>	<i>Above 365 RO'000</i>	<i>Total RO'000</i>

Ba3	41,564	(1,111)	40,453	39,484	(39)	39,445

Bank balances and long term bank deposit

The Company limits its credit risk with respect to bank deposit by only dealing with banks with high credit rating. The Company's bank accounts are placed with reputed financial institutions with a minimum credit rating of Ba3 (2023: Ba3) Moody's Investors Service ratings. The table below shows the balances with banks categorised by short term credit ratings as published by Moody's Service at the reporting date.

	2024 RO'000	2023 RO'000
Bank balances:		
Bank Muscat SAOG	18,277	(285)
Oman Arab Bank SAOG	12,659	250

Ahli Bank SAOG	12,477	2,366
National Bank Oman SAOG	436	649
	44,130	3,682

37.3 Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The Company limits its liquidity risk by ensuring that a working capital facility is available, when required.

38 EARNINGS PER SHARE

Basic earnings per share is calculated by dividing the net profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year.

	2024 RO'000	2023 RO'000
Profit / loss for the year:		
Continuing operations	22,222	(13,720)
Discontinued operations	-	2,317
Profit / loss for year for basic earnings	22,222	(11,403)
Weighted average number of shares outstanding during the year (number of shares in thousands)	200,000	179,315
Basic and diluted earnings per share (Baizas) - continuing operations	0.11	(0.08)
Basic and diluted earnings per share (Baizas) - discontinued operations	-	0.01
Basic and diluted earnings per share (Baizas)	0.11	(0.06)

39 SEGMENT REPORTING

The CEO and executive management team are the Company's Chief Operating Decision-Makers (CODM). Up to 31 May 2023, the principal activities of the Company were distribution and supply of electricity in the South Batinah, Dakhliyah, North Sharqiyah and South Sharqiyah governorates of Oman. Both distribution and supply business were considered as one reporting segment. Pursuant to the transfer of assets and liabilities pertaining to supply business to NESO, effective from 1 June 2023 as disclosed in Note 4, the principal activity of the Company is distribution of electricity in Oman, except for Dhofar Governorate where Dhofar Integrated Services Company SAOC is licensed to provide distribution and supply of electricity and water services. There are no other economic characteristics within the Company that will lead to determination of other operating segments. Accordingly, CODM has determined that the Company has only one operating segment, which is consistent with the internal reporting and performance measurement.

40 CLIMATE RELATED RISKS

The Company and its customers may face significant climate-related risks in the future. These risks include the threat of financial loss and adverse non-financial impacts that encompass the political, economic and environmental responses to climate change. The key sources of climate risks have been identified as physical and transition risks. Physical risks arise as the result of acute weather events such as hurricanes, floods and wildfires, and longer-term shifts in climate patterns, such as sustained higher temperatures, heat waves, droughts and rising sea levels and risks. Transition risks may arise from the adjustments to a net-zero economy, e.g., changes to laws and regulations, litigation due to failure to mitigate or adapt, and shifts in supply and demand for certain commodities, products and services due to changes in consumer behaviour and investor demand. These risks are receiving increasing regulatory, political and societal scrutiny, both within the country and internationally.

While certain physical risks may be predictable, there are significant uncertainties as to the extent and timing of their manifestation. For transition risks, uncertainties remain as to the impacts of the impending regulatory and policy shifts, changes in consumer demands and supply chains. The Company is making progress on embedding climate risk in its risk framework.

41 COMPARATIVE AMOUNTS

Certain corresponding figures for the year ended 31 December 2023 pertain to the classification of meter reading charges which have been reclassified from general and administrative expenses to operating costs in order to conform to the presentation for the current period. Such reclassification does not affect previously reported loss.

42 EVENTS AFTER THE REPORTING DATE

There are no events post the reporting date that require adjustment or disclosure in these financial statements.
